Education

SRM University AP Aug. 2024 – May 2028
Bachelor of Technology in Computer Science and Engineering *Amaravati, AP*

- CGPA: 9.11
- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, Design and Analysis of Algorithms, Machine Learning

Projects

UniMeet | *MongoDB, Express.js, React, Node.js* May 2026

- Built a MERN-based faculty appointment management platform with role-based dashboards for **students, faculty, and administrators**.
- Implemented **JWT-based authentication and protected REST APIs** to provide secure, role-based access across the platform.
- Developed responsive appointment booking and time-slot management interfaces using **React and Tailwind CSS**.

Deepfake Image Detection | *TensorFlow, OpenCV, NumPy* May 2026

- Built a **CNN-based deepfake image classification system** using TensorFlow/Keras.
- Preprocessed image datasets using **OpenCV and NumPy** and applied image augmentation techniques to improve model generalization.
- Tuned model architecture and training parameters to improve **validation performance**.

Hospital Management System | *MySQL* May 2026

- Designed a **normalized relational database** for managing patients, doctors, appointments, and billing information.
- Implemented SQL queries, joins, **stored procedures, triggers, and CRUD operations** for core hospital workflows.
- Applied relational constraints and normalization techniques to maintain **data integrity and reduce redundancy**.

Technical Skills

Languages: C, C++, Python, JavaScript, SQL, HTML/CSS
Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, TensorFlow, Scikit-learn
Databases: MySQL, MongoDB
Tools: Git, GitHub, VS Code, Postman, Docker, Figma
Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, REST APIs, Machine Learning

Certifications & Achievements

Certifications:

- MongoDB Associate Developer Certification (MongoDB)
- Introduction to Computer Vision and Image Processing (IBM)
- Natural Language Processing with Classification and Vector Spaces

Achievements:

- Secured **2nd Place** in the **Unstop Hackathon** for developing an innovative software solution.
- Active LeetCode solver, consistently practicing Data Structures and Algorithms through **Striver's A2Z DSA Sheet**.
- AI/ML: Hands-on experience building Machine Learning and Computer Vision applications using TensorFlow, Scikit-learn, OpenCV, NumPy, and Python.
